Intelligent Actual-position Feedback Unit

Intelligent Actual-position Feedback Unit for Linear Valves

SISTO-SK-i LED

Product description of SISTO-SK-i LED

SISTO-SK-i LED is an intelligent actual-position feedback unit for linear valves. Valve position is indicated visually and clearly by means of coloured high-visibility LEDs. User-friendly setting of limit positions by automatic initialisation in situ or via the process control system.

SISTO-SK-i LED continuously records valve travel and comprises a microcontroller-based analysing unit. Valve position is signalled visually by the device's high-visibility LEDs and electrically via digital outputs.

SISTO-SK-i LED is connected via an M12 connector. It is ready for operation as soon as initialisation is complete.
