SISTO-SK-i.310 Intelligent feedback unit

for linear valves up to 60 mm stroke

- Clear visual status and position indication thanks to powerful LED signalling
- Automatic on-site initialisation via magnet or remote initialisation via process control system
- Non-contact, wear-free travel measurement
- Optical feedback of the open and closed position via high-visibility LEDs and electrical feedback via digital outputs
- Communication interface 24V, IO-Link¹ or AS-Interface¹ (¹expected to be available from 3rd quarter/2025)
- Optionally with integrated 3/2-way solenoid valve
- Easy to retrofit, even to other linear valves
- Smooth, easy-to-clean surfaces
- IP65 compliant
- Housing made of reinforced polyamide
- 50% less installation space than previous generation (due to lower height and smaller diameter)

Accessory Set SK-i.310 (Programming magnet, Allen key)
